

The Dynamic reporting usage agreement's purpose is to function as a pop-up consent for data processing. By default, the agreement is only visible and can only be accepted or declined by users assigned with administration rights.

To access the Dynamic reporting usage agreement, select **[!UICONTROL Tools]** > **[!UICONTROL Advanced]** > **[!UICONTROL Deployment wizard]**.

Instance configuration wizard 'consent-inst'

PII Consent Setting

Adobe Campaign : Notice of data transfer and prohibition from including personal data in Dynamic Reporting.

?

If you use custom profile data with Dynamic Reporting , you understand and agree that any data processed using these tools may be transferred to, stored, and processed in the United States.

Please be aware that some types of profile data may be considered personal information in certain jurisdictions, and that Adobe makes no representations or warranties regarding the lawful transfer of personal data when using Dynamic Reporting . 'Personal data' as used in this context is defined to have the same meaning given in any and all relevant applicable privacy or data protection laws relating to this or any similar term (such as "personal information" or "personally identifiable information").

Because the transfer of personal data to a country such as the United States may be subject to certain legal restrictions in other regions, you should be sure that your use of the tools mentioned above is consistent with any restrictions that may apply to the data.

If your company chooses to use Dynamic Reporting for data subjects located in Europe (or any other jurisdiction that may limit the onward transfer of personal data), you are prohibited from including personal data in Dynamic Reporting and you should not check the box.

First and Last Name:

Company:

Title:

☒ Ask Me Later

☐ Allow

☐ Deny

Three options are available:

- **UICONTROL Ask me later**: Until you accept or decline the agreement, the profile dimensions will not appear in your reports and your customers' Personal identification information will not be collected or sent.
- **UICONTROL Accept**: By accepting this agreement, you authorize Adobe Campaign to collect your customers' Personal identification information and to transfer them to the reporting or data center.
- **UICONTROL Decline**: By declining the agreement, the profile dimensions will not appear in your reports and your customers' Personal identification information will not be collected or sent. Note that in this case externalID will still be collected and used to identify end-users.

The table below displays what happens after accepting with this agreement depending on your region.

	Dynamic reporting	Microsoft Dynamics 365 connector
Americas & APAC (Asia Pacific)	<p>Feature available.</p> <p>All out-of-the-box (i.e. city, country/region, state, gender and segments on the age basis) & custom profiles information pushed into the US reporting center.</p>	<p>Feature available.</p> <p>All out-of-the-box & custom profiles fields and Adobe Campaign event fields are processed in the US data center.</p>

Dynamic reporting		Microsoft Dynamics 365 connector
EMEA (Europe Middle East & Africa)	Feature available. All out-of-the-box (i.e. city, country/region, state, gender and segments on the age basis) & custom profiles information pushed into the EMEA reporting center.	Feature available. All out-of-the-box & custom profiles fields and Adobe Campaign event fields processed in the EMEA data center. [!UICONTROL Control data] which contains Adobe I/O registration data and IDs of customer end-user events sent and stored in the US data center.

The table below displays what happens after declining this agreement depending on your region. Note that even if you decline this agreement, reporting on deliveries and Microsoft Dynamics 365 integration will still be available.

Region	Dynamic reporting	Microsoft Dynamics 365 connector
Americas & APAC (Asia Pacific)	Feature available. No out-of-the-box & custom profiles information pushed into the US reporting center with the exception of ExternalID.	Feature available. No out-of-the-box or custom profile fields sent to the US data center with the exception of External ID and Recipient ID. All Adobe Campaign event fields processed in the US data center with the exception of mirror page ID.
EMEA (Europe Middle East & Africa)	Feature available. No out-of-the-box & custom profiles information pushed into the EMEA reporting center with the exception of ExternalID.	Feature available. No out-of-the-box or custom profile fields sent to the EMEA data center with the exception of External ID and Recipient ID. All Adobe Campaign event fields processed in the EMEA data center with the exception of mirror page ID.
